Profile

Dynamic Junior Software Engineer with hands-on experience at Silver Touch Technologies, specializing in AI-driven automation, data extraction, and workflow optimization. Successfully boosted client efficiency by up to 10× through innovative AI and RPA solutions. Proficient in Python with a solid foundation in machine learning, computer vision, and web automation. Known for critical thinking, problem-solving, and delivering practical, impactful results in fast-paced environments.

Experience

JR. PROGRAMMER | SILVER TOUCH TECHNOLOGY | JUL 2024 – PRESENT

- Developed custom data extraction pipelines using various open-source Large Language Models (LLMs) and Optical Character Recognition (OCR) tools to process unstructured PDF documents.
- Accelerated processing of 100+ PDFs from several days to 1–2 days, significantly increasing client efficiency and reducing manual effort.
- Built automation solutions for repetitive tasks involving web workflows, spreadsheet operations, and data handling using Python.

SOFTWARE TRAINEE ENGINEER | SILVER TOUCH TECHNOLOGY | JAN 2024 – JUN 2024

- **RPA Development:** Worked on a client project as an RPA Developer for 1 month, developing a highly scalable and efficient bot to automate repetitive tasks, improving client workflow efficiency.
- **AI Project - Self-Driving Car:** Developed a project on a self- driving car, utilizing AI techniques to create an autonomous vehicle system, demonstrating deep learning and computer vision skills

WEB DEVELOPER INTERN | INEURON.AI | MAY 2023 – JUN 2023

- Developed a full-stack web application using the Django framework, adhering to the Model-View-Template (MVT) architecture.
- Implemented the Object-Relational Mapping (ORM) system to interact with the database, enhancing data management and query efficiency.
- Designed and implemented the front-end using HTML, CSS, and JavaScript creating an intuitive and responsive user interface

Education

B.E. IN INFORMATION TECHNOLOGY | SEP 2020 – MAY 2024 | A. D. PATEL INSTITUTE OF TECHNOLOGY – VIDHYANAGAR, GUJARAT, INDIA

Skills & Abilities

Technical skills: Python, Computer vision, Machine Learning, Image processing, Robotic process automation, SQL

Soft skills: Team work, Creative thinking,
